Medical Facilities

A "leak free" environment is essential at this medical facility located in Cuyahoga County. The existing modified bitumen roofing was removed. 1½ inches of polyurethane foam was spray - applied and tapered to eliminate ponding water. The SPF is protected by 15 mils of Hydrosil 465 silicone coating.

 Job #23049

This 33,400 sq. ft. roof received a 10 year full system contractors warranty.

Ponding water is clearly visible in this "before" picture.

Steel foam stop manufactured by our sheet metal dept. was installed along the roof perimeter.

Ceramic granules are embedded into the final silicone top coat for added protection.
